iCONNECT names Encore Legal Solutions ASP of the Year

Los Angeles, CA (March 15, 2007) - iCONNECT Development, LLC recently honored Encore Legal Solutions as ASP (Application Service Provider) of the Year for 2006. The award was given at iCONNECT's annual Partners Conference in Key Largo, Florida where the company was host to over 40 ASP/CSP companies, several software partners and an array of speakers who led discussions and educational sessions on many of the pressing issues facing the legal industry today. Encore, a leading national provider of litigation support solutions, was named Application Service Provider of the year based on its outstanding service performance and substantial hosting volume.

"Not only was Encore one of our first ASPs and has been iCONNECT's top performer since our inception, but they consistently deliver excellent service to their clients on both our iCONNECTnxt and v4 software platforms," said Cynthia Williams, Chief Executive Officer of iCONNECT Development, LLC. "We are thrilled to present them with this award as our Top ASP for 2006."

Headquartered in The Woodlands, Texas, Encore provides quality products and services to the nation's leading law firms and corporate legal departments featuring electronic data discovery and web-based archiving systems. In 2006, Encore was ranked as one of the industry's leading providers of electronic data discovery and related services, including Web hosting, reprographics, scanning, and coding, by an independent industry survey.

"The iCONNECTnxt and iCONNECTv4 systems have allowed us to provide a superior solution for our customers with real value," said Steve Moore, VP of Technical Services of Encore Legal Solutions. "Their continued dedication to support our service efforts and provide new software enhancements continues to give us competitive advantages in the legal market place."

iCONNECT's secure web-based access supports the review process by enabling clients, counsel, staff and consultants located in multiple locations to review confidential documents with ease. iCONNECT's suite of products feature extensive search capabilities, native file viewing, bulk review options, keyboard shortcuts, and metrics reports.

iCONNECTnxt, the company's flagship product, is fully integrated with other leading products such as LiveNote, IPRO, CaseMap and DocuLex to form a core part of a total litigation support solution. iCONNECTText, has all the end user features of nxt combined with direct access to Oracle. This allows for optimized performance, a streamlined workflow and the ability to integrate the Data Server with your existing infrastructure. The iCONNECTnxt Pod combines data-warehousing, security and bandwidth in a fully configured ready-to-use iCONNECTnxt system. This is ideal for law firms and corporations that do not have the technical staff or capital budget to maintain the infrastructure for an internal repository environment.
